

# Turning on Network Discovery via Group Policy

---

[reddit.com/r/activedirectory/comments/yfbo1u/turning\\_on\\_network\\_discovery\\_via\\_group\\_policy](https://www.reddit.com/r/activedirectory/comments/yfbo1u/turning_on_network_discovery_via_group_policy)

Computer Configuration --> Administrative Templates --> Network --> Link-Layer Topology Discovery:

Both of these are enabled and allowed while on the domain.

Turn on Mapper I/O

Turn on Responder

And after that failed I added a second policy to the firewall:

Computer Configuration --> Administrative Templates --> Network --> Network Connections --> Windows Defender Firewall --> Domain Profile:

Allow inbound file and printer sharing
